PERIPHERALS

NCoder

The NCoder allows operators of Salto smart access control systems to quickly assign, modify, and invalidate physical credentials through an intuitive, dedicated encoding solution. Operators and system administrators can quickly and securely add securely encoded smart access credentials.

Features

- Ease of use, with a fast, simple programming tool for RFID credentials that puts the set-up, modification, and invalidation of physical smart RFID credentials at their fingertips.
- Compatible with a wide range of RFID cards technologies*.
- Connectivity with the latest smart access control technology, leveraging our best-in-class Salto SVN data-on-card, BLUEnet Wireless and JustIN Mobile technologies.
- Enhanced security guaranteed, using highly secure encrypted algorithm to process and encode keycards.
- Standards-compliant reader/encoder with SAM data are not stored in the device to ensure secure key management technology system.

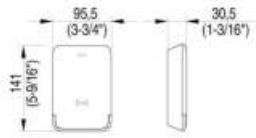

* Enhanced security guaranteed, using highly secure DESFire smart card technology to process and encode keycards for Homelok.

Technical characteristics

- Dimensions: 95,5 x 141 x 30,5mm
- Communications protected by standard cryptography (DTLSv1.2 - AES128).
- Cover material: PC/ASA
- Power consumption: 5V
- DHCP IP addressing*.
- Connection to the PC: USB or Ethernet*, simplifying power source requirements and allowing for easy connectivity to the existing security infrastructure.

*Depending on the model and platform.
