PRODUCT SPECIFICATION

## WI-FI DOOR CONTACT SENSOR

Model: MOS-SD-DOOR-SEN-WZ

MOSINO WI-FI SMART DOOR CONTACT

Mosino offers Smart door contact sensors for multi-family and commercial environments that are fully integrated in Mosino Smart Home Platform. Each sensor can be setup using Mosino Staff Hub (Android and iOS) mobile applications available in the Play Store and App Stores. These applications allow pairing and configuration directly from with-in application.

Mobile Application

The smart door contact sensor can be used via Mosino mobile applications as well as Mosino In-Suite tablets. The switches can be setup for apartments, rooms, or common areas.

Automation

Various automation options exist in Mosino Smart Platform that allows the property managers to configure each smart device. Options may vary on the model, platform integration, however, automatic turning lights on/off based on various event triggers can be setup. For common area bookings, property managers can also grant temporary access to the customer.

Wireless Door Contact Sensor

Mosino offers door contact sensors that are simple to deploy and configure. Each sensor can be attached on the call using an adhesive back plate. Sensors can be connected as soon as they are plugged to the In-Suite tablets and the mobile application.

Features & Function

- Model: MOS-SD-DOOR-SEN-WZ

- Network: Zigbee, WI-FI

- Color: white

- Sensitive angle: standby current

- Wireless Type: Zigbee, wi-fi

- Wireless Range: 45m

- Wireless frequency: 2.4GHz

- Working Temperature: -10℃~55℃

- Working Humidity: 95%RH

- Battery: DC1.5V AA*2 (NOT INCLUDED)

- Working voltage: DC3V
