PSTN Dialer

C200620

Product description

The Gallagher PSTN Dialer provides a reliable, resilient communication pathway for sites that require assured alarm delivery to monitoring stations. Designed to integrate directly with Gallagher Controllers, it enables alarms to be transmitted using industry standard Contact ID, ensuring dependable reporting even in the event of IP network disruption.
By offering a redundant alarms channel and supporting legacy PSTN infrastructure, it delivers value for organisations transitioning to modern security architectures while still requiring guaranteed failover. With on board integration and full compatibility with the Controller 7000 Enhanced and Controller 6000, the PSTN Dialer ensures alarms always reach the people who need them.

Product details

Features:

- Supports PSTN dial up communication for transmitting alarms to a monitoring station using the Contact ID format, ensuring industry standard compatibility.
- Can be used alongside the Command Centre IP Alarms feature to provide redundant failover communication to alarm monitoring stations.
- Installs directly on board the Controller 7000 Enhanced and Controller 6000, delivering seamless system integration without additional external modules.

Product Specification

Voltage	13.6 ± 15% Vdc	Operating Temperature	-30 to +50 °C
Humidity	95% non-condensing
