

# Simply Smarter Video Surveillance

THE EAGLE EYE CLOUD VMS

## More than Just a Security System

Eagle Eye Networks is the global leader of cloud video surveillance, revolutionizing the way businesses of all sizes and types address their security needs.

With the Eagle Eye Cloud VMS, accessing historic and real-time video is simple and requires no additional software. By storing video in the Cloud, businesses minimize the hardware needed and the cost associated with it.

Paired with broad camera compatibility, numerous analytic tools, and an open API platform, Eagle Eye Networks provides businesses with a tool that is more than just a video security system.

## Modernize Your Video Security

Traditional video security systems require substantial amounts of hardware, complicated installations and constant software maintenance and management. Eagle Eye Networks is here to change that.

The Eagle Eye Cloud VMS revolutionizes video surveillance with an infinitely scalable and comprehensive solution that streamlines everything from user management to flexible cloud and on-site storage options.

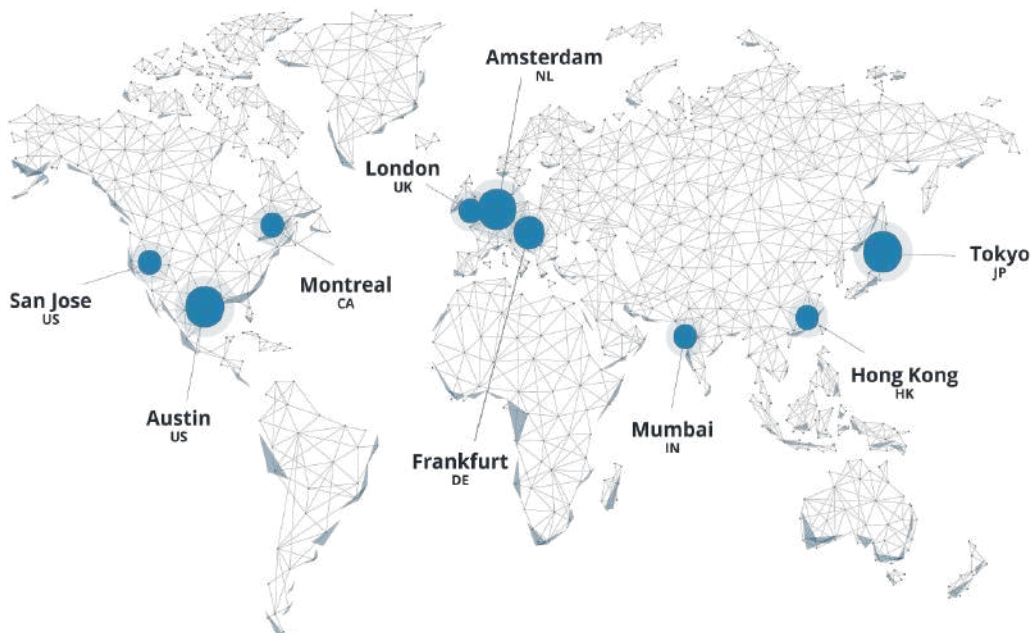

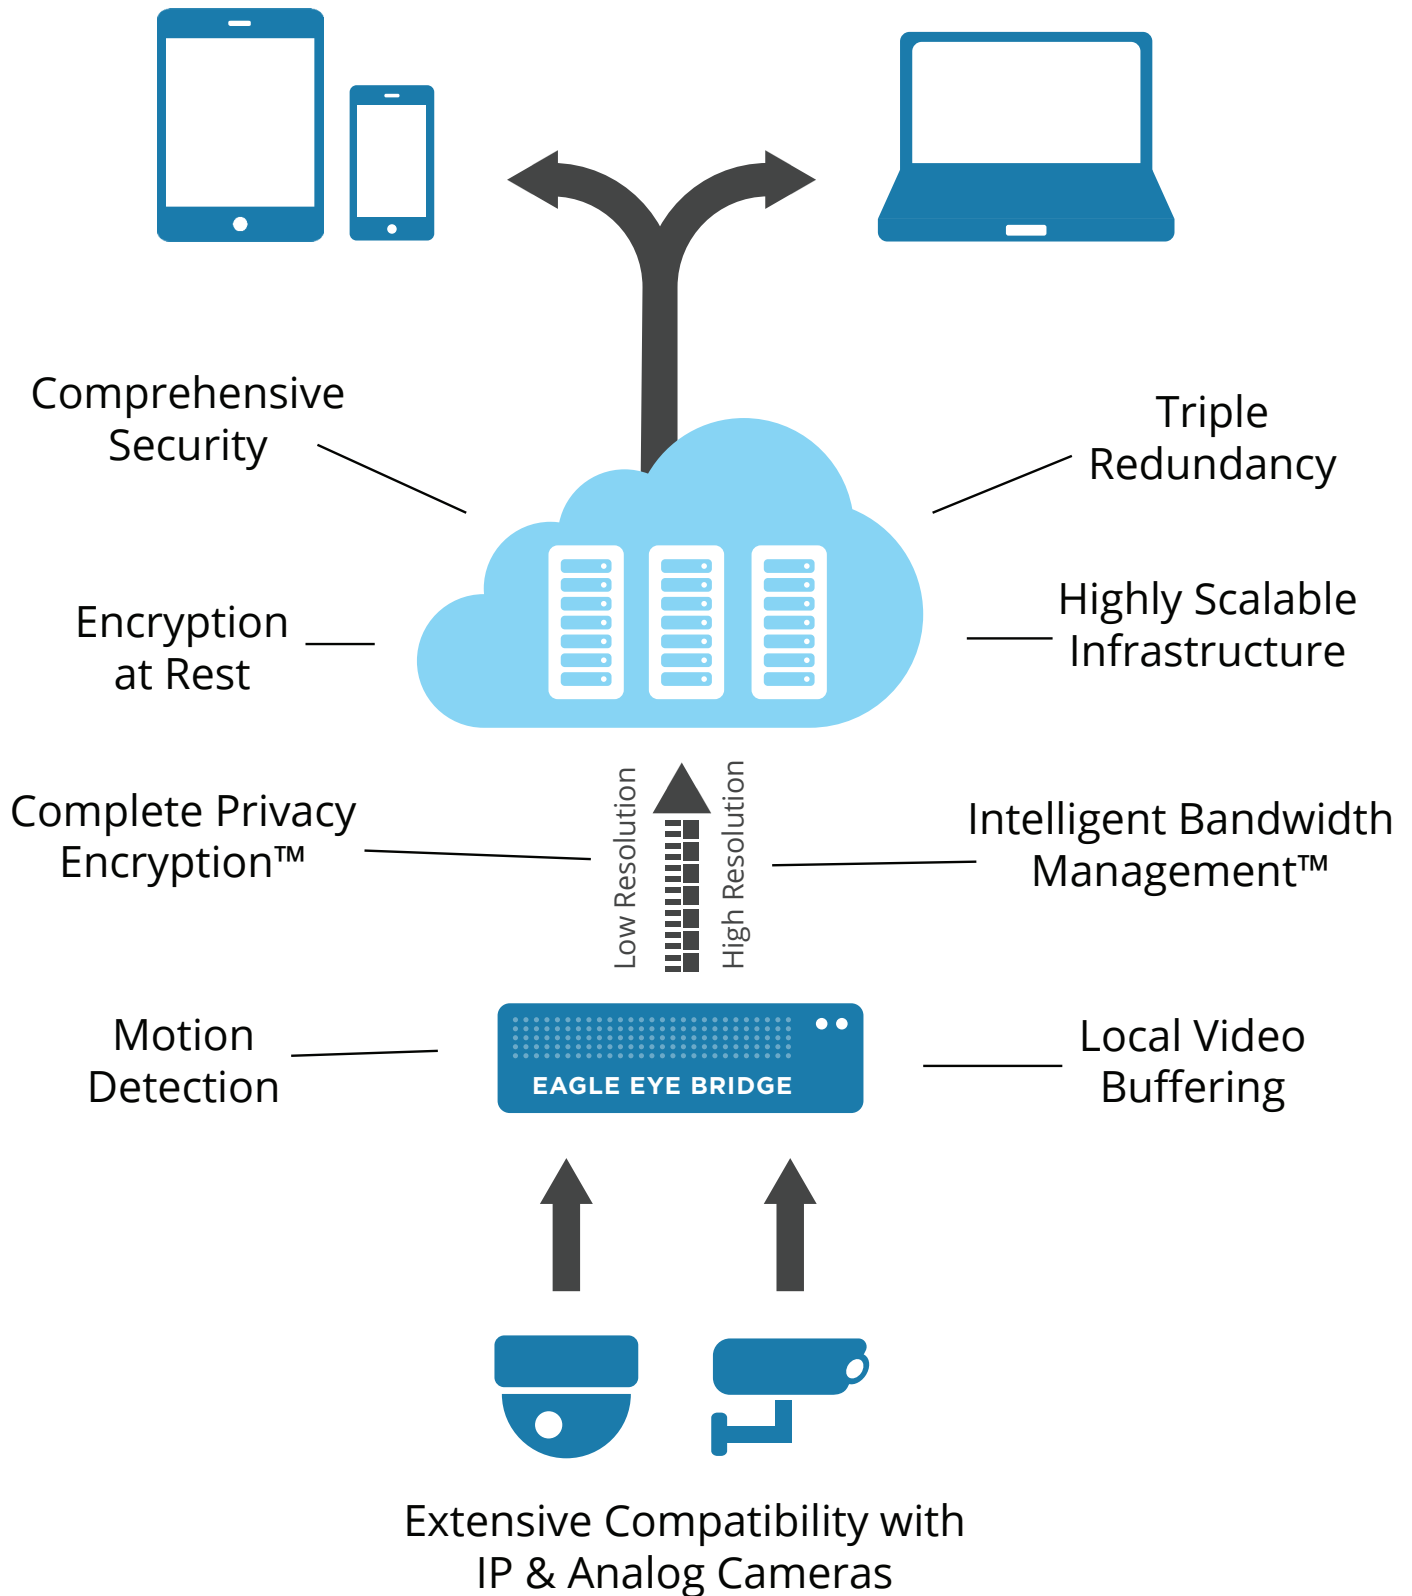

## Why Businesses Choose Eagle Eye Networks

The Eagle Eye Cloud VMS is a simple, scalable solution designed to accommodate an unlimited number of sites and users.

SECURE	RELIABLE	FLEXIBLE
Fully encrypted video during transmission and at rest.	Intuitive interface, smart AI and advanced analytics.	Compatible with existing IP or analog cameras.
Cameras isolated from network.	Intelligent bandwidth management.	Cloud storage with on-premise options.
No open ports or firewall configuration necessary.	Triple redundant video and metadata storage.	Reduce CapEx with pay as you go Cloud model.

Eagle Eye Networks has a global presence with customers in over 80 countries and 11 data centers worldwide.

## Powerful Solutions for Every Industry

Eagle Eye Networks provides tailored solutions that address the needs and budget of any size company.

## Flexibility to Use New or Existing Hardware

One of the biggest benefits of cloud video surveillance is the lower total cost of ownership (TCO). Cloud technology offers businesses substantial economies of scale with low upfront costs, no cost to add additional locations, and reduced maintenance costs with software updates being delivered automatically, eliminating the need to replace existing hardware.

With Eagle Eye Networks, you can choose from over 3,000 IP, analog, and HD over Coax cameras. Pay only for what you need and update your hardware when you're ready.

## Optimize Business Performance

Using advanced analytics provides unprecedented insight into day-to-day operations, making it easy to quickly respond to incidents and uncover opportunities for operational improvement.

### LOITERING

Prevent crimes like vandalism and break-ins by tracking and receiving notifications when people or vehicles stay in one spot for too long.

### INTRUSION

Monitor vulnerable areas, especially after hours, by setting parameters that trigger alerts when the predetermined area is entered.

### CAMERA TAMPERING

Reduce false alarms and ensure a camera is not being blocked, covered or moved with AI-based camera tampering.

### LINE CROSSING

Minimize theft, break-ins and vandalism by sending an alert when a moving object crosses over a user-defined virtual line.

### PEOPLE COUNTING

Monitor patterns like how many customers enter your business each week, peak times for traffic and customer behavior patterns.

## An Ecosystem of Technology Partners

As an open-source platform, Eagle Eye Networks can meet any security need, letting you expand and customize the solution for your unique business needs.

The Eagle Eye Video API Platform gives you the freedom to build new, feature-rich software development kits (SDKs) and application programming interfaces (APIs) or choose from existing best-in-class applications that are ready to use.

Eagle Eye Networks has partnerships with these companies and more:

## Secure Remote Access

Traditional systems require port forwarding to grant users remote access to their video surveillance systems, leaving the system vulnerable to cyber threats. The Eagle Eye Cloud VMS has no open ports and was designed for secure remote access, allowing only outbound connections to the Eagle Eye Cloud.

Business owners can rest assured that their business is always secure and accessible from anywhere in the world.
